

# Testing Timeline Planner

Diagnostics → first test → retake window → stop rule + deadlines.

## How to use

Fill in your diagnostic, first test date, retake window, and a stop rule. Then map deadlines (ED/EA/RD) so testing doesn't collide with essays.

Field	My plan
<b>Test choice (SAT or ACT)</b>	
<b>Diagnostic date (SAT)</b>	
<b>Diagnostic date (ACT)</b>	
<b>First official test date</b>	
<b>Retake window (if needed)</b>	
<b>Target score range</b>	
<b>Stop rule (when to stop testing)</b>	
<b>ED/EA deadlines (if any)</b>	
<b>RD deadlines</b>	
<b>Score send / reporting notes</b>	

## Quick checks

- My first test date leaves room for an 8–12 week prep block.
- I have at least one realistic retake window (if data supports upside).
- Testing does not collide with peak essay months (Aug–Nov).
- I know whether my target schools allow Score Choice / superscoring.
